

**Daffodil International University**  
 Faculty of Science & Information Technology  
 Department of Computer Science & Engineering  
 Mid Examination, Spring 2025  
 Course Code: MAT101, Course Title: Mathematics-I

Level: L1 Term: T1 Batch: 68

Time: 01:30 Hrs

Marks: 25

**Answer ALL Questions**

*[The figures in the right margin indicate the full marks and corresponding course outcomes. All portions of each question must be answered sequentially.]*

|    |      |  |   |     |
|----|------|--|---|-----|
| 1. | a) ✓ | Demonstrate the prime factorization of 3600 using the <u>tree diagram</u> . Also, find all factors and <u>sum of the composite factors</u> .   | 3 | CO1 |
|    | b) ✓ | Three bells ring at interval of 12 minutes, <u>21 minutes</u> , and <u>28 minutes</u> respectively. If they all ring together at <u>11:00 AM</u> , find the time when they will ring together? | 2 |     |
| 2. | a) ✓ | If $7^x + 7^{-x} = 8$ then find the value of x.  | 2 | CO1 |
|    | b) ✓ | Demonstrate the solution of the inequality $\frac{x^2 + 12x + 35}{x^2 - 6x + 9} \leq 0$ using sign table. [-7, -5]   | 3 |     |
| 3. | a) ✗ | Apply the Remainder Theorem for solving the following polynomial equation $x^6 + 12x^5 + 46x^4 + 52x^3 - 15x^2 = 0$ $(x^2(x^4 + 12x^3 + 46x^2 + 52x - 15))$                                    | 5 | CO2 |
| 4. | a) ✗ | If $y = \sin^{-1}(e^{\ln(\sin x)})$ and $z = x^{x^x}$ then examine the rate of change of z with respect to y or $\frac{dz}{dy}$ .  | 5 | CO3 |
|    | b) ✗ | Examine the rate of change of y with respect to x or $\frac{dy}{dx}$ of the function $y = \tan^{-1} \sqrt{\frac{1-x}{1+x}} + \tan^{-1} \left( \frac{\cos x}{1 + \sin x} \right)$               | 5 |     |

$$f(x) = \frac{(x+7)(x+5)}{(x-3)(x-3)}$$

$$\frac{1}{2} = \left( \frac{1-x}{1+x} \right)^{\frac{1}{2}} = \sqrt{\frac{1-x}{1+x}}$$
