

Daffodil International University

Faculty of Science & Information Technology
Department of Computer Science and Engineering

Final Semester Examination, Spring-2024

Course Code: CSE112 Course Title: Computer Fundamentals

Level:1 Term:1 Batch-66

Exam Duration: 2 Hours

Marks: 40

Answer ALL the Questions

[The figures in the right margin indicate the full marks and corresponding course outcomes. All portions of each question must be answered sequentially.]

1.	a)	<p>Imagine you are a logic circuit designer for a well-known technology company. Your task is to redesign a complex logic circuit to reduce manufacturing costs without sacrificing performance. Here's the original circuit you're tasked with redesigning. Now, develop a more cost-effective logic circuit solution.</p> <div style="text-align: center;"> </div>	[6]	CO3
	b)	<p>Now, generate the truth table for the output expression and then compare it with the simplified expression.</p>	[4]	
2.	a)	<p>What is variable and explain the types of variables with proper coding example.</p>	[4]	
	b)	<p>The CSE teacher want to make a list of only those students who have passed (obtained 40% or more marks) in the final examination. In the end, he also wants to print out the total number of students who have passed. Assuming that the input data of all the students is terminated by a trailer record, which has sentinel value of 241-15 for student ID.</p> <p>Now, your job is to write the algorithms and draw a flowchart to help the teacher.</p>	[6]	CO4

3.	✓ Why is the OS important? Explain- How does the OS provide security to the data and information? ✓	[5]	
	✓ Emily works for a multinational corporation with offices located in different cities worldwide. To ensure seamless communication and data sharing between offices, Emily decides to establish dedicated connections between each office using leased lines. Each office has a direct connection to the main headquarters, forming a fully interconnected network. Identify the network topology used in Emily's setup and explain its suitability for inter-office communication.	[5]	CO1
4.	A government agency's website was hacked, and false information was posted, causing public panic and misinformation. Identify the type of cyber-attack involved in this incident and discuss the impact on public trust in government institutions. Propose measures the agency can take to restore public confidence and prevent future attacks on its website	[10]	CO1
