Daffodil International University

Department of Computing and Information System (CIS)
Final Examination: Spring Semester-2025
Program: B.Sc. in CIS
Course Code: CIS 311
Course Title: Network Security and Cryptography

Total Time: 2 hours

Total Marks: 40

(Answer all the following questions)

[The figures in the right margin indicate full marks for the respective questions]

1.	BRAC Bank PLC is a private commercial bank in Bangladesh, founded in 2001. The bank has a network of over 190 branch, 74 sub branch, 457 SME unit offices, and over 329 ATMs, 10 CDMs, 68 RCDMs across the country. In addition to traditional banking services such as deposits, loans, and card, BRAC Bank also offers digital banking, including online banking, mobile banking, and e-wallet services. The head office situated at Dhaka and all the 190 branches are connected with head office network located around the country. Besides, they need to maintain a country wide ATM network therefore all the sensitive customer data are stored permanently in head office server. In May, 2019, BRAC bank was hacked and lost 11 corer taka. Now days cyber-attack become increasing than any time therefore it has bring attention to the authority. Realizing the reality, the authority is taking several initiatives to increase the overall security of the bank.	Marks	
(a)	Draw a network diagram that shows the main components of the network along with security device of the network.	[4]	CLO-3
(b)	The authority of the bank is very much concern about security of the data. Now you are asked to deploy the **server** of "BRAC Bank PLC" duel firewall architecture. Select one suitable technology and also justify your answer with relevant example.	[6]	CLO-4
