

Class Test-1, Spring 2026

Course Code: CIS121, Course Title: Introduction to Industry 4.0

Marks: 15

Time: 30 Minutes

Name: N. M. Nayem - UI - Islam

ID: 261 - 16 - 032

Section: 24 - A

Date: 10.02.2026

1. Which of the following is an AI application sector?

- ☒ (a) Finance (b) Traditional weaving (c) Hand painting (d) Pottery

2. Internet of Things can be used for-

- ☒ (a) Recognizing images and objects ☒ (b) Real-time device communication
☒ (c) Human-like decision making (d) Data analysis and insights

3. Which AI technique is used for image recognition?

- ☒ (a) Computer Vision (b) Blockchain (c) Cloud Computing (d) Big Data

4. Autonomous robots can be used in which core technology?

- ☒ (a) Smart Logistics ☒ (b) Industrial Simulations (c) Remote Monitoring (d) Predictive Analysis

5. Which Industrial Revolution introduced computers and automation?

- (a) First (b) Second ☒ (c) Third (d) Fourth

6. The main feature of the Second Industrial Revolution is-

- (a) Steam Power (b) Artificial Intelligence (c) Automation ☒ (d) Electricity

7. Briefly describe the main types of Artificial Intelligence (AI) with suitable examples for each type. [3]

⇒ Basically there are 3 main types of AI.

1. Narrow AI : Task specific.

Ex: Google translation, Face recognition, chat GPT

2. General AI : Human level AI.

Ex: Hypothetical AI

3. Super AI : Beyond Human level.

Ex: imagine in fiction, movies.

8. How can Artificial Intelligence (AI) be implemented in the agriculture sector of Bangladesh to develop a smart farming environment under Industry 4.0? [6]

⇒ AI is a revolutionary change over everything in the era of makes Industry 4.0.
